Element Receives National Recognition

Minneapolis, MN – May 21, 2018 – Element Technologies, LLC announced today that WatchGuard Technologies, a global leader in network security, secure Wi-Fi, and network intelligence products, has recognized Element as the North America End User Project of the Year winner in the company's 2018 Partner Awards program. WatchGuard and its channel

community gathered in Miami, Florida, to celebrate another year of tremendous growth and momentum, and honor top-performing partners. [Read the full release here.](#)

Cybersecurity Webinar

Craig Sixta spoke to the clients of BGM Wealth Partners on July 25th on the topic of Cybersecurity. The event was well received and Craig has already received glowing feedback and requests from participants to have Craig come out and speak to their respective organizations. Well done, Craig!

Service Spotlight: Security Awareness Program

Cybersecurity Awareness is not an option for organizations, it is a requirement. With today's constant and real-time threats by bad actors trying to gain access to our information and systems, organizations need to take proactive steps to ensure they are educating their people on best practices and are consistently updated on the latest trends. Firewalls, anti-virus and anti-malware are all part of the equation, however Cybersecurity Awareness is the most important part of a strong defense! Element provides organizations of all sizes with a great solution / program!

Tip of the Month

Passwords - never use the same one across your accounts! Why? One reason is if a bad actor were to gain access to your personal email or other account, they can easily look up where you work (LinkedIn, etc.) and attempt to use the same password to get into your work account bypassing all of the layers of protection your company has invested in! You are the most important link to protecting your information, but also your company's information!
